

Output for the Python code

1. Output:

```
enter your first number:2
enter your second number: 3
Sum is:5

Process finished with exit code 0
```

2. Output:

```
string:
Lorem Ipsum
LrmIsm

Process finished with exit code 0
```

3. Output:

```
Roll_No  Name      Marks
1        Abc       90
2        Def       95
3        Ghi       85

2  Def 95
Process finished with exit code 0
```

4. Output:

```
enter the number:545  
it is a palindrome  
  
Process finished with exit code 0
```

```
enter the number:544  
it is not a palindrome  
  
Process finished with exit code 0
```

5. Output:

```
  *  
 * *  
* * *  
* * * *  
* * * * *
```
